CAREER HISTORY

Blast Analytics and Marketing

2019 to Present - Junior Analytics Consultant

As an analytics consultant, I help companies manage, debug, and implement analytics into their websites. This includes solving problems and implementing solutions with Javascript, JQuery, and adding tags through Google Tag Manager. I also add new features and help debug our automated debugging tool that is written in ReactJS.

Intridia

2019 to 2020 - Software Developer Intern

As part of my internship, I used ReactJS, Nodemailer, and Express to develop a marketing website with an interactive contact page. Additionally, I worked on implementing new features in the company's testing suite using ReactJS and Express.

Clearlink

2019 - Sales Associate

At Clearlink, I received inbound calls from potential clients. I guided them through their options while finalizing their orders and verifying their information in the sales software.

ACADEMIC BACKGROUND

Utah Valley University

Associates Degree of Science | August 2014 - May 2016
